Chris,

Please see the attached plugging record for the NBU #15-W24 and NBU #16-W22. Let me know if you need anything else.

Thanks,

Rosalind

THIS EXTERNAL EMAIL WAS SAFELY RECEIVED THROUGH THE CHAPARRAL MIMECAST SERVICE.

Thanks Rosalind,

Please send the work completed form for the plugging of 15-W24 when it is done. The plugging records for 16-5 and 16-8 don't indicate a problem that needs to be corrected. They are plugged similar to other wells in the field from that period that we have deemed adequate. Plus, the monitoring well system is in place because of concerns about old wells. 16-W22 is adequate as a shut-in injector with future plans for P&A.

Chris,

Just following up with you regarding your questions.

NBU #16-22: The decision was made to plug this well after earlier attempts to correct injection zone failed.

NBU #15-24: Plugging (top plug) will be completed soon.

NBU #16-5 & NBU #16-8: These wells are similar to the previously plugged old wells in the AORs. I've attached the records for this wells for your review, but are as shown in the tabulations.

Let me know if you need anything else.

Thanks!
